DETAILED ACTION

This action is in response to papers filed 11/21/07.

Claims 1-34, 43-45, 51 and 55 are under consideration.

Rejections Maintained

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-34, 43-45, 51 and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ganne (US 6251407) in view of Barnett et al. and Damaskus (US 3269905).

Applicant argues that under KSR there is no reason provided by the examiner to combine the references and that the references alone or in combination do not suggest the desirability of there combination. Applicant argues that because of the allowability of claim 1, the remaining dependent claims are also allowable.

Applicant's arguments have been fully considered and not found persuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208

Art Unit: 1648

USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

The prior art compositions teach an antigenic medium and an adjuvant. Oils are used as adjuvants and thus would form distinct layers when combined at 4 or more degrees C. Freezing of vaccine components has been show in the art. Applicants arguments would be persuasive in a method to make a layered composition but the arguments do not differentiate over *prima facie* obvious compositions of the prior art.

Thus, it would be *prima facie* obvious to freeze a vaccine composition of Ganne to maintain the potency of the antigen with the expectation of success knowing that frozen concentrated viral antigen retains its potency.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
